

Pallet Flow Rack

Pallet flow rack is designed for first-in, first-out (FIFO) inventory management.

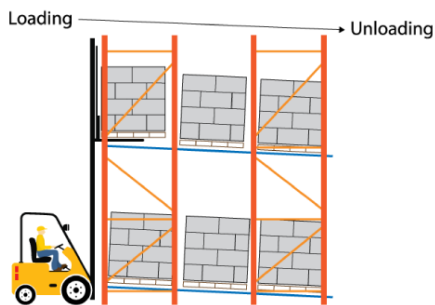

Rack supports inclined rollers or wheels that allow pallets to glide from the back (loading) aisle to the front (picking) aisle. Brakes can be included for speed control. These gravity systems provide excellent volume utilization.

Pallet flow rack allows for continuous inventory rotation and high storage density. This racking system maximizing storage space by minimizing aisles making pallet flow an ideal solution where space is limited such as in freezer or cold storage applications. Pallet flow rack is optimal for palletized or date sensitive products.

Pallet Flow Rack Product Flow

Pallets are loaded from the back of the system and glide to the front for picking. When the front pallet is unloaded, the next automatically glides into picking position.

Pallet Flow Rack Specifications and Options

Frame types:

- Roll formed – open and closed column
- Structural channel

Depth Range:

- Shallow lane storage (2 – 4 pallets deep) to deep lane storage (10 – 12 pallets deep)

Accessories:

- Entry guides

- Ramp stops
- Speed controllers

Options:

- Polycarbonate wheels: ideal for loads over 3,000 lbs.; best choice for freezer storage applications
- Full and split steel rollers: ideal for all pallet types light or medium weight; allows for changing pallet configurations

Complete Rack System Products and Services

REB Storage Systems International can provide you with products to complete your material handling system, including decking, shelving, and mezzanines.

At REB Storage Systems International, we combine our superior selection of quality products with professional, first-rate service. We will gladly assist you with selecting the right options for your particular needs and can provide additional support to help you complete your project. From rack system engineering to rack installation, we can help with all of the needs of your material handling operations.

Now that you have a better understanding of pallet flow rack, we'd appreciate the opportunity to help you with the next step in your research, whether that be more information or a quote request.

Email info@rebstorage.com or call 800-252-0400 to give us a better idea of your needs.
